SALAŠKI SPECIJALITETI OD MANGULICE

Kobasica ala mangulica | 20,00 KM
Šnicla od mangulice na žaru sa gljivama | 22,00 KM

Istraživanja kvaliteta mesa mangulice pokazala su da konzumiranje ovog mesa dovodi do stvaranja takozvanog HDL holesterola, odnosno „dobrog“ holesterola, koji blagotvorno djeluje na osobe sa povišenim nivoom masnoća u krvi. Sadržaj holesterola u mesu mangulice je čak do nevjerovatnih 75% niži u odnosu na druge rase.

Njena mast po kvalitetu može se porediti i sa maslinovim uljem, jer sadrži samo „dobar“ holesterol. Tajna ovakvog kvaliteta mesa mangulice leži u tome što se one ne hrane koncentratima – njihov jelovnik identičan je ishrani divlje svinje. Veći dio hrane pronalaze rijući zemlju i jedući šumske plodove.

Uživajte u specijalitetima od mangulice.
Zdravije se hranite na našem i vašem „Semberskom salašu“.

Prijatno
